

Artistic drawing tips box
Theme: Revived legends

This nomination gives a competitor the possibility to show its professionalism and mastery of technique of artistic hand drawing.

Theme: Revived legends

Legend is one aspect of a mythical prosaic folklore, a record of some historical events and people. In some transferring meaning, these are some important and famous events from the past, that are still causing thrill and which are described in tales and myths.

Legend is a synonym for the word Myth. All the events that are told through legends are most commonly exaggerated, and much of this is a fiction. That is the reason why scientists do not rank legends as authentic historical testimony, but they certainly do not dispute that many legends are based on real events. This category gives the possibility to present some legends that you are fond of through your work.

The greatest attention should be paid on a good imaging of the theme, composition, choice and combination of colors. The things that would be evaluated the most are: using the technique of drawing, level of complexity of drawings, as well as mastery of work of the master.

Terms:

1. Design should be done on tips before the beginning of the competition(as homework) and it should be brought in a box which you can buy or make. The box size depends on competitors imagination
